Acknowledgement

We are thankful to our honorable Principal **Dr. H. M. Nimbark**, Head of the department **Dr. Shivani Patel** and our faculties who have fulfilled the need of industrial visit to enhance the scope of theory and practical knowledge and exam pattern of the Microbiology, Chemistry and PGDMLT students of semester-1.

We are especially thankful to **Mr. N N Thakkar (Owner)** for share his expertise and informative lecture.

Information about Pharmaceutical Industry:

Medinex Laboratories is a private limited Indian company, founded by the Chairman Mr. N N Thakkar in 1972. It was a humble beginning based on clear vision and strong dignified business ethics.

Until 2006, the focus was on manufacturing formulations. A few APIs, which were in short supply, were developed with in-house technology.

Carbazochrome JP was the first API developed in India in 1982 as also the intermediate DL-Adrenaline.

In November 2006, Medinex commissioned its brand new facility at Ukharla, Bhavnagar and manufactures only niche APIs and specialty chemicals.

Medinex employs state of the art scientific and technological innovation to consistently deliver the best quality APIs& speciality chemicals.

Purpose of Industrial Visit:

- 1) Interaction of students with actual industry personals.
- 2) To make them aware of the industrial procedures required to enter in any company.
- 3) To make them experience the work environment of industry and visualize all the important departments in the Industry.
- 4) To introduce students with the people of all important departments.
- 5) To prepare the students for the selection of career path in different departments of industry.
