Linkedin profile building activity

(Class: B.Sc & M.Sc sem-3)

The basic functionality of LinkedIn allows users to create profiles, which for employees typically consist of a curriculum vitae describing their work experience, education and training, skills, and a personal photo. this application is very useful for students .

Linkedin profile making activity has been done on 01/07/2023 in B.Sc sem-3 & M.Sc sem-3. 25 students were present during the session.
